

Press Release

medac integrates production sites under a unified brand

The medac group is strengthening its international brand identity. As of 1 April 2026, the company's production sites in Brno and Dessau operate under the shared name medac pharma production.

Wedel, 1 April 2026 – The medac group brings its production sites in Dessau and Brno together under the corporate brand medac. As of 1 April 2026, the former companies Oncotec Pharma Produktion GmbH and oncomed manufacturing a.s. operate under the name **medac pharma production**.

The new company names are:

- medac pharma production GmbH (Dessau)
- medac pharma production a.s. (Brno)

With this step, medac aligns its production activities under the corporate brand and establishes a clear structure within the group.

Unified brand approach strengthens the corporate presence

Following the rebranding, both production sites operate under the medac brand and apply a shared brand identity. The legal independence of the companies remains unchanged.

The harmonised brand structure provides greater transparency for partners, customers and employees worldwide and supports the long-term development of the medac group as a global pharmaceutical company.

Production in Europe for quality and reliable supply

Manufacturing in Europe has always been a core element of medac's corporate approach. In-house production capabilities enable the company to maintain high quality standards and ensure a reliable supply of medicines for patients.

The unified naming of the production sites underlines this commitment and strengthens manufacturing capabilities within the medac group.

"The integration of the production sites under the medac brand is a clear commitment to quality, reliability and a consistent brand presence," says Gerhard Wurzer, Chief Operating Officer of the medac group.

About medac

At medac group, we believe that health is humanity's most valuable resource. Since 1970, our mission has been to improve patients' quality of life worldwide by making the best medical treatments available. As a globally operating pharmaceutical company headquartered in Germany, we provide high-quality medical treatments for patients worldwide in over 90 countries. With more than 2.000 employees we are committed to improving human health.

Our products are manufactured in Germany and other European countries to the highest standards, utilizing our own logistics center and production sites, and subsequently distributed worldwide.

We are constantly working to improve authorized medicines and to develop innovative therapies in the fields of rheumatology, urology, hematology, and oncology. Part of our mission is to provide safe, high-quality and innovative original products, as well as generics and biosimilars. In this way, we make vital treatments accessible to those affected.
